- Budget Development
- Grant Proposals
- Project Management

Typical Systems

- Studios and Control Rooms
- Master Control
- CentralCasting
- Asset Management
- Facility moves and upgrades
- Large Scale AV
- Media Convergence
- Tapeless Workflow

Deep Experience.

We have thirty years experience in systems integration, working with some of the best integrators in the industry: Diversified Systems, TGS (bought by Ascent Media), and The Whitlock Group. Literally thousands of systems designed and built. Many were “firsts” in DTV, HDTV and Asset Management.

We listen better

Yes, we have deep experience. But our job is not to tell you what to do. It’s to listen, understand your vision and your organization’s mission, and then, bring that vision to life.

We translate Effectively

Broadcasters, AV specialists, IT departments, Architects, Contractors, Academics and Upper Management all have their own language and concerns. We deftly translate between each group to help the entire project run smoother, not just our little part.

We save you money

The ICIA, which is the professional certifying organization for systems integrators, estimates that for every dollar spent on a good consultant, nearly three dollars are saved on over all project costs. Think about it.

We save you frustration

That money saves also means frustrations avoided. Less change orders. Less “Uh-OH’s” More accurate timelines and budgets.
